

Google Maps for Work: Offering the Power of GIS to Everyone

Derek Imes & Michael Sliwka

Geospatial Account Manager & Geo
Engineer

Onix

2014 Ohio GIS Conference

September 22 - 24, 2014 | Hyatt Regency Columbus | Columbus, Ohio

Be Where Aware!

Who is Onix?

- HQ Located in Lakewood, Ohio
- Small business that provides industry-leading solutions in information technology
- Specializes in technologies and services that help optimize IT infrastructure for secure, manageable, and reliable data.
- Serving clients in the corporate, federal, state, and local government markets since 1992
- Projects and capabilities are geographically dispersed supporting customers worldwide
- Google for Work Partner since 2002 - representing Google Earth and Maps, Search, Apps
- First Google partner to hold a GSA Schedule

The Consumerization of GIS

- Consumer-focused location applications have grown exponentially
- Google Maps has changed employees' expectations for how easy it should be to put similar location intelligence to work for their business
- Not replacing ESRI - Google's Value is to enhance ESRI
- No infrastructure/barrier to entry
- Google offers the world's most accurate global coverage
- An active mapping community that makes daily updates, giving users the benefit of continuous improvement and innovation

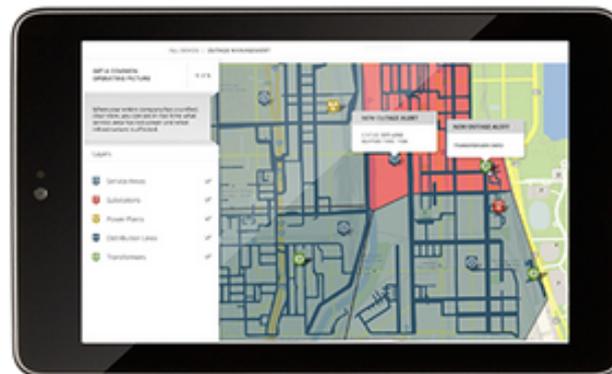

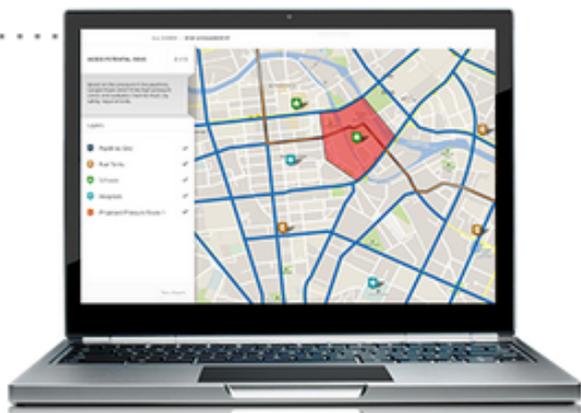

Visual Your Data, on Google maps

Make better decisions

Optimize people and assets

Engage your customers

Build amazing apps

Google Maps for Work Services

- Google Maps for Work API - Starts with a map
 - Geocoding API
 - Directions API
 - Distance Matrix API
 - StreetView API
 - Static Map API
 - Elevation API
- Google Maps Engine - single platform to create, manage, publish & share your data, layered on Google Maps & Google Earth
 - Acquire Data -> Build Maps -> Share with Anyone, Anywhere
 - Similar to Google Drive/Google Apps Control Panel
 - User-Friendly, Multiple Levels of Access
 - Three Types of Users: Admin, Map Editor, Map Viewer
 - Overlay your data and 3rd party data
 - Focus on your business, not infrastructure

India 1804

The map shows the British colonies in India at the beginning of the 19th century. Military roads and passes are shown. The map is based on surveys made by the British East India Company which had a monopoly on trade in India at that time. Attribution: Map by James Rennell, Thomas Kitchen, Robert Laurie and James Whittle
